Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/505,447

Applicant(s)

ODA ET AL.

Examiner

Kevin R. Kruer

Art Unit

1773

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-14 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-14 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 9/2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 9/1 and 12/15/2004.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: ____.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statements filed herein have been fully considered. An initialed copy of the two PTO-1449s are enclosed with this action.

Drawings

3. The drawings filed on 9/1/2004 are accepted.

Specification

4. The abstract of the disclosure is objected to because it is not included on a separate sheet of paper. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-4 and 7-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, it is unclear to what components the mass ratio of line 3 refers.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1773

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Auclair (US 5,932,655) in view of Ueyama (US Pat 5,284,884) and Ueda (US 5,886,098).

Auclair teaches a thermoplastic molding composition which feature improved impact and reduced opacity. The composition comprises @35-75wt% of a copolymer matrix, (a) 1-29wt% of a grafted rubber with a weight average particle size of 0.05-.30um (abstract). The matrix (c) is herein relied upon to read on the claimed continuous phase and comprises styrene and methyl methacrylate in a ratio of 80:20 –65:35 (col 5, lines 48+). The grafted particle (a) comprises a grafted phase of styrene and methyl methacrylate (col 2, lines 20+) in relative amounts of 80:20-65:35. The core shell phase and grafted phase and grafted phase are included in amounts of 0.3-1 (col 2, lines 20+). The core-shell phase comprises 5-30wt% of a vinyl aromatic polymer (col 2, line 31) and 70-95wt% of a diene (col 2, lines 39) such as butadiene. Said core/shell is understood to read on said claimed “elastomer” and the particle is understood to read on the claimed dispersed stage.

Said refractive index difference between the continuous phase and the dispersed phase is not explicitly taught to be not more than 0.05. However, Auclair teaches opacity should be reduced. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to minimize the refractive index difference between the matrix and the particles in order to minimize opacity.

Art Unit: 1773

Auclair teaches the composition may contain an antistatic agent but does not teach said agent should be included in a second layer. However, Ueyama teaches antistatic agent may be coated on the surface of a substrate wherein the antistatic agent is dispersed in a resin composition comprised of the same resin as the substrate (col 1, lines 23+). Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to coat the substrate taught Auclair with a protective layer comprising said same resin composition and an antistatic agent. The motivation for doing so would have been because Ueyama teaches such a technique is known in the art for imparting antistatic properties to a substrate.

Auclair also does not teach the claimed antistatic agent. However, Ueda teaches claimed components B1-B3. Ueda teaches said components may be added to a thermoplastic composition in amounts of 3-40% in order to impart antistatic properties to said composition (abstract). Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the antistatic agent taught in Ueda as the antistatic agent added to the protective layer taught by Auclair in view of Ueyama. The motivation for doing so would have been because Ueda teaches said composition gives such compositions excellent antistatic properties.

With respect to claims 4-6, said claim does not specify the substrate comprises a total of 100 parts by weight. Thus, the examiner takes the position that the composition taught in Auclair still reads on said claimed relative amounts of continuous phase and dispersed phase.

Art Unit: 1773

With regards to claim 7, the examiner takes the position that it would have been obvious to one of ordinary skill in the art at the time the invention was made to vary the thickness of the laminate according to the desired end use. Furthermore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to vary the relative thickness of the protective layer depending upon the desired resistivity.

With respect to claim 8, the examiner takes the position said limitation is inherently met since the surface layer and the substrate layer comprise the same composition.

With respect to claims 10-14, the examiner takes the position that the preamble limitations do not inherently introduce structure to the claim thus distinguishing the claimed invention from the invention taught in the prior art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin R. Kruer whose telephone number is 571-272-1510. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carol Chaney can be reached on 571-272-1284. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 1773

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
